RIDG-U-RAK UPRIGHTS:

High performance Ridg-U-Rak sets the industry standard for rigidity, strength and durability. The slotted upright and beam connection make it the easiest rack to install or to change beam levels.

Rack capacities shown are based on the new RMI (Rack Manufacturers Institute) standards. COLOR: Dark Green

SPEEDRACK UPRIGHTS:

* Teardrop - Closed Column Design

Closed Column Design: Any Engineer will confirm the fact that a closed tube column is much stronger than an open Box channel. A closed column also increases torsional resistance more than 200 times over any relative openshape. All speedrack columns, beams, horizontals and diagonals are tubular. That is Strength working for your safety.

SPEEDRACK BEAMS:**Color: Orange**

Alpha-Omega Shelving, Inc. Stocked Speedrack beams are one of the leaders in teardrop connector style pallet rack. Speedrack utilizes minimum 3 pin connectors as a standard, not 2 pin like many other manufacturers. This provides additional strength, safety and resistance to accidental dislodging.

**Safety pins are included in the price of the beam but are shipped loose for field installation.*
